

WebMail User Guide:

What is WebMail?

WebMail is a web interface for you to access your email currently on the server. It was designed to allow email access from anywhere in the world via the Web. WebMail will not show you email that has already been downloaded to a client (Outlook Express etc.)

To access WebMail, login from our homepage, or go to <http://webmail.eotnet.net> Enter your username (the part of your email address before the @ symbol) and password.

For more information or help with WebMail, login to WebMail. Click the "Help" at the top of the window. Useful information regarding using and viewing email via WebMail can be found here.
